

AMBITIOUS MALIGNANCY

AMBIITION

Latin = ambitio

from

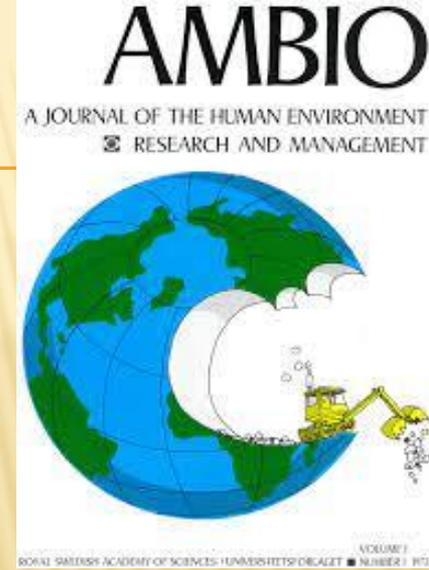

Ambio = to go about, or to seek by making interest, of

Amb=about

and

Eo = to go

Origin = practice of Roman candidates for office, who went about the city to solicit votes

---Webster

CURRENT USE

- A desire of preferment or of honor
- A desire of excellence or superiority

Good sense - emulation springing from laudable ambition

It denotes **also** an inordinate desire of power or eminence

often accompanied with illegal means to obtain the object

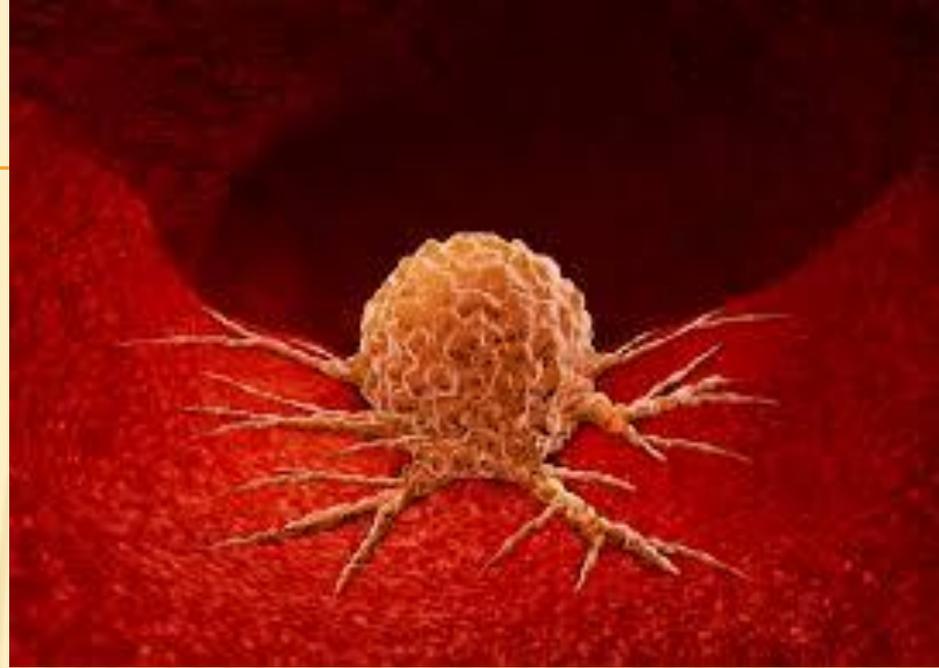

- ---Webster

MALIGNANCY

- ❑ Extreme malevolence
- ❑ Bitter enmity
- ❑ Malice

-Unfavorableness
-Virulence

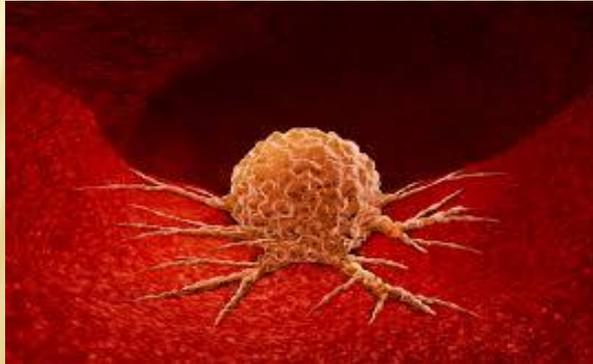

---Webster

MALIGNANT

Latin - malignus, maligno

from malus = evil

- Malicious= having extreme malevolence or enmity
- Exerting pernicious influence
- Virulent
- Dangerous to life
- Extremely heinous

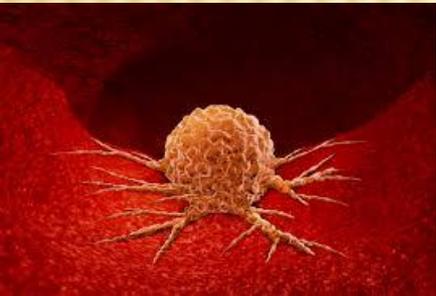

---Webster

MALIGNANT DISEASE?

C A N C E R

-
- ❑ Cancer refers to any one of a large number of diseases **characterized** by the
 - ❑ development of abnormal cells that
 - ❑ divide uncontrollably and have the
 - ❑ ability to infiltrate and destroy normal body tissue.

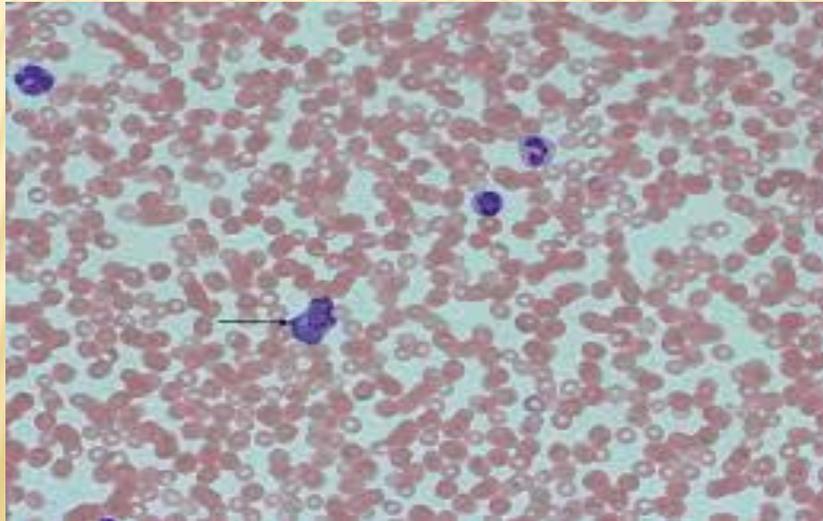

- ❑ Cancer often has the ability **to spread** throughout your body. --->Mayo clinic

CAUSE...

□ The eating of pork has produced ...cancerous humors - 1864

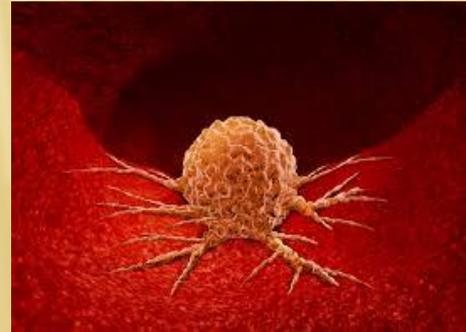

□ Flesh meats constitute the principal article of food ..until their blood is filled with cancerous ... humors -1875

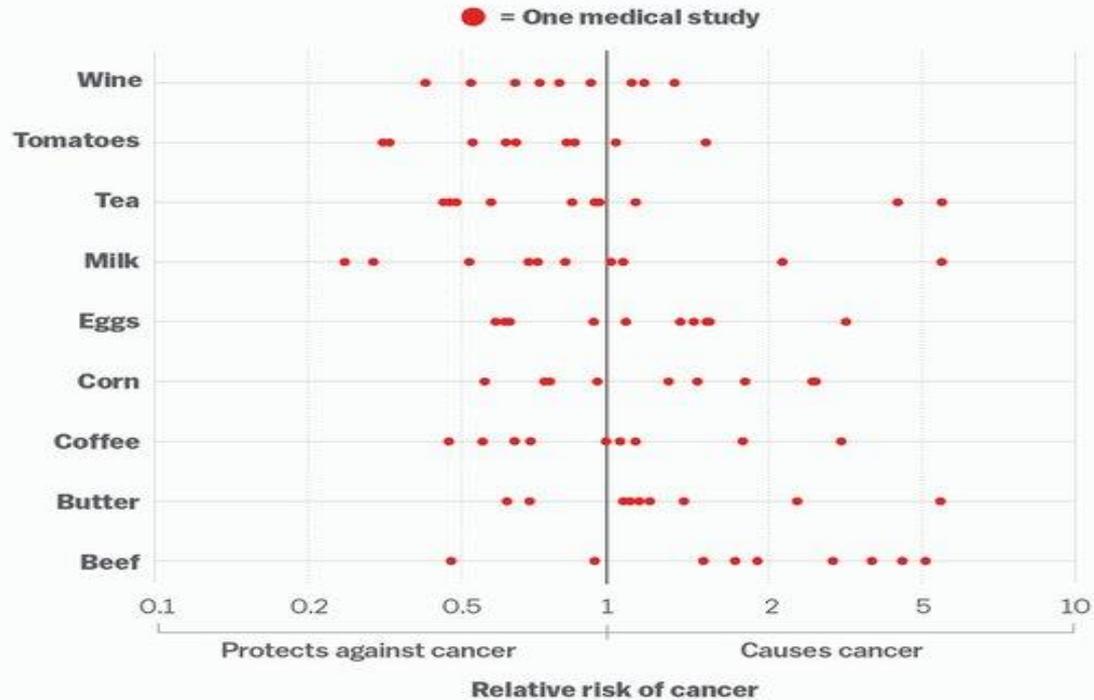

DEFECTIVE IMMUNITY

- Cancers, tumors, and all inflammatory diseases are largely caused by meat-eating

- From the light God has given me, the prevalence of cancers and tumors is largely due to gross living on dead flesh- 1890

Everything we eat both causes and prevents cancer

SOURCE: Schoenfeld and Ioannidis, *American Journal of Clinical Nutrition*

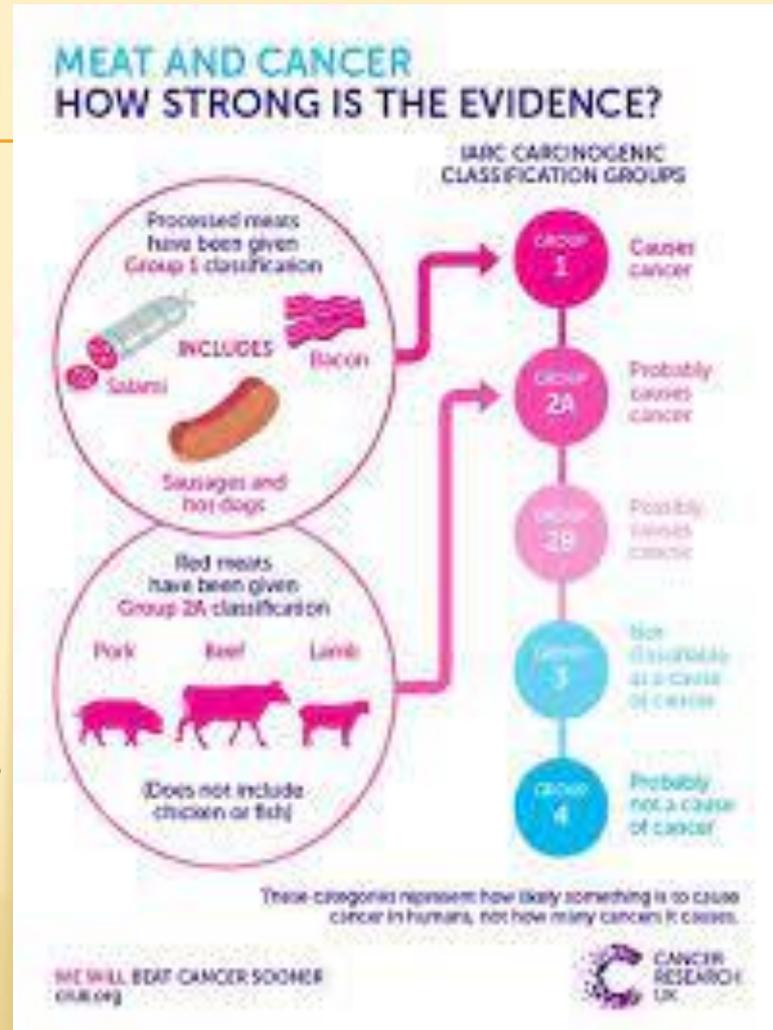

Vox

-
- The testimony of [meat] examiners is that very few animals are free from disease, and that the practice of eating largely of meat is contracting diseases of all kinds—cancers, tumors... 1897

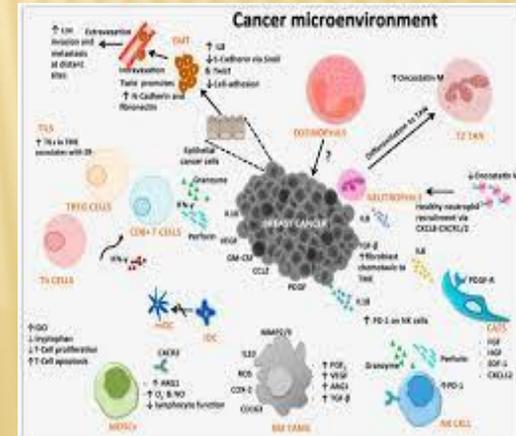

Many people are eating meat filled with consumption and cancerous germs- 1901

People are continually eating flesh that is filled with tuberculous and cancerous germs Tuberculosis, cancer are thus communicated -1905

- Cancerous humor, which would lie dormant in the system their lifetime, is inflamed, and commences its eating, destructive work [as a result of weakening the life forces] -1864

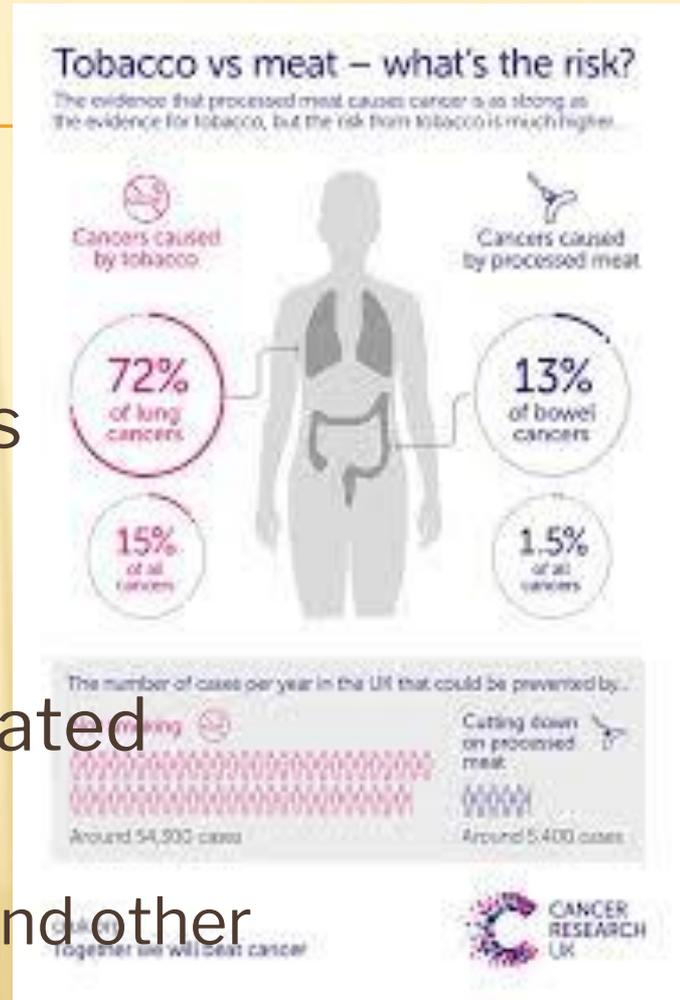

VIRUS ...

- Flesh was never the best food...
- People are continually eating flesh that is filled with tuberculous and cancerous germs

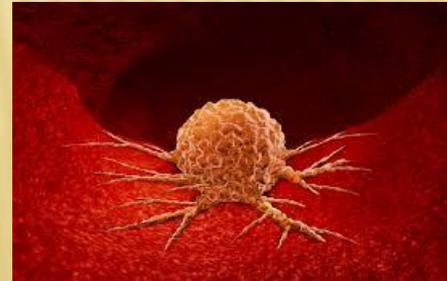

Tuberculosis, cancer, and other fatal diseases are thus communicated
{MH 313.2} 1905

- “Germs” - bacteria, viruses, prions, and other

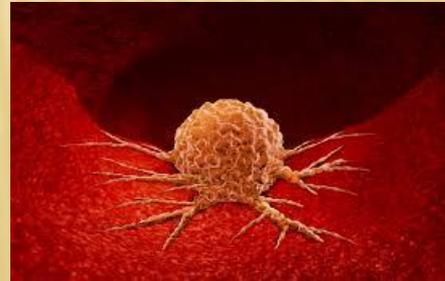

- **In 1956 Dr. Wendell Stanley, University of California virologist and Nobel Prize winner - "viruses cause most or all human cancers"**
- **Viruses can lurk in the human body for years.**
- **walking around with "sleeping cancer viruses."**
- **Dr. Stanley - cancer viruses might become active, through circumstances such as aging, dietary indiscretions, hormonal imbalance, chemicals, radiation-> malignancies**

- **—Newsweek, June 18, 1956, p. 102.**

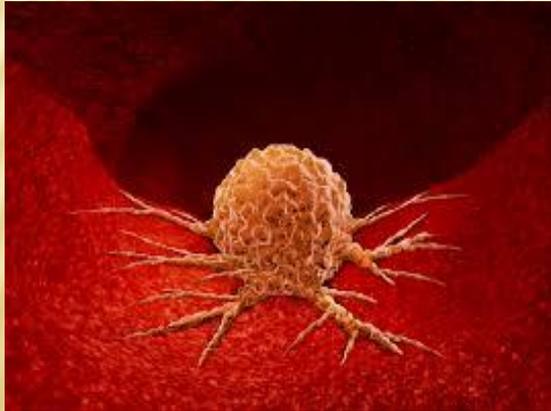

Dr Stanley - cancer viruses might become active through circumstances such as aging

- Ellen G. White wrote in 1864: "Cancerous humor, which would lay dormant in the system their life-time, is inflamed, and commences its eating, destructive work." —*Appeal to Mothers*, p. 27.

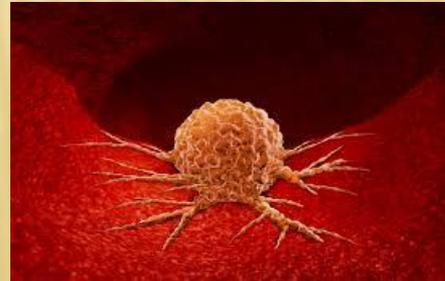

DIETARY INDISCRETIONS

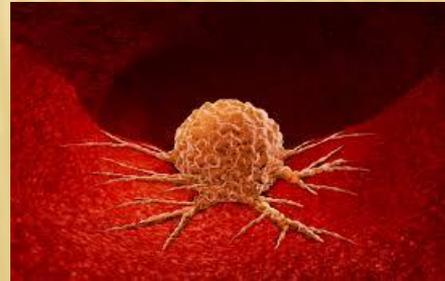

- Ellen White has linked cancer with improper diet
- First - *Spiritual Gifts*, volume 4, in 1864 page 146
- Second - *The Ministry of Healing*, in 1905

-
- **1875 - Flesh meats constitute the principal article of food upon the tables of some families, until their blood is filled with cancerous ...*humors***
 - **—*Testimonies*, vol. 3, p. 563.**

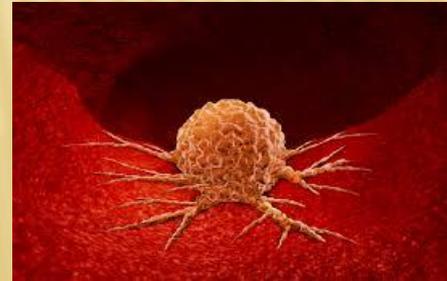

-
- **1896 - Cancers, tumors and all inflammatory diseases are largely caused by meat eating**
 - **From the light God has given me, the prevalence of cancers and tumors is largely due to gross living on dead flesh**
 - **—*Medical Ministry*, p. 278.**

HORMONAL IMBALANCE

- General Conference in session in 1909
Ellen White stated –
- **If meat eating was ever healthful, it is not safe now**
- **Cancers, tumors, and pulmonary diseases are largely caused by meat eating**
- **—*Testimonies*, vol. 9, p. 159**

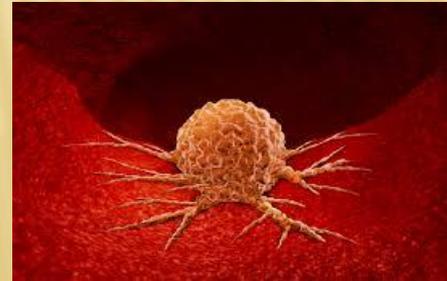

HORMONAL IMBALANCE

- Ellen White recognized factors other than meat eating
- "Hormonal imbalance." Writing, as she said, of what "I have been shown," Ellen G. White in 1864 in *Appeal to Mothers* as foundation for "cancerous humors" (p. 18)
- Dr Stanley designates "hormonal imbalance" as one factor that activate cancer viruses lying latent in human system

CHEMICALS

- 1865 in *How to Live* No 3 - **This is the influence of mercurial preparations... It torments the system as long as there is a particle left in it.**

- **It frequently manifests itself in tumors, ulcers, and cancers, years after it has been introduced into the system.—**
"Disease and Its Causes," pp. 55-59

SALT

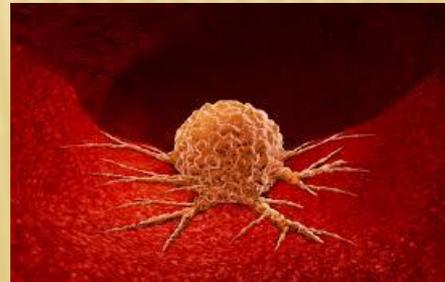

The Ministry of Healing - 1905: "Do not eat largely of salt " —
Page 305

I use some salt, and always have, because from the light given me by God, this article, in the place of being deleterious, is actually essential for the blood.

The whys and wherefores of this I know not, but I give you the instruction as it is given *me*.

—***Counsels on Diet and Foods*, p. 344**

—*Testimonies*, vol. 9, p. 162

HIGH SALT INTAKE AND CHANGES IN LEVELS OF GASTRIC ACID SECRETION, STOMACH CANCER.

NATIONAL CANCER CENTER

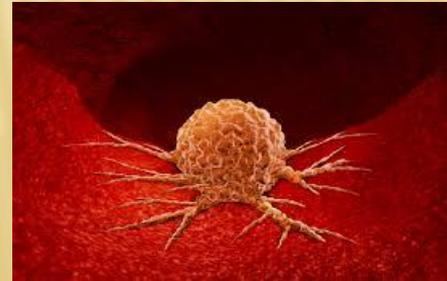

Role in the pathogenesis of Gastric Cancer

- Direct damage of the gastric mucosa causing excessive cell replication
- Indirect effect by increasing of the mutagenic potential of N-nitroso compounds (Correa, 1992)
- Damage caused by salt may also increase gastric *H. pylori* colonization (Fox et al., 1999; Nozaki et al., 2002), which is also supportive of an early role in the pathway

- Int J Mol Sci. 2020 Jun; 21(11): 4114.
 - Published online 2020 Jun 9. doi: 10.3390/ijms21114114
 - Dietary Fat and Cancer—Which Is Good, Which Is Bad

 - A high-fat diet induces changes in gut microbiota leading to activation of pro-inflammatory pathways, and obesity - exacerbates inflammation - known risk factor for cancer.
 - Experimental data showed that **dietary fat has a greater impact on the pathogenesis of cancer**
 - Consumption of plant monounsaturated fatty acids (MUFAs), particularly from olive oil, has been associated with lower cancer risk
 - Similarly, the replacement of animal MUFAs with plant MUFAs decreased cancer mortality

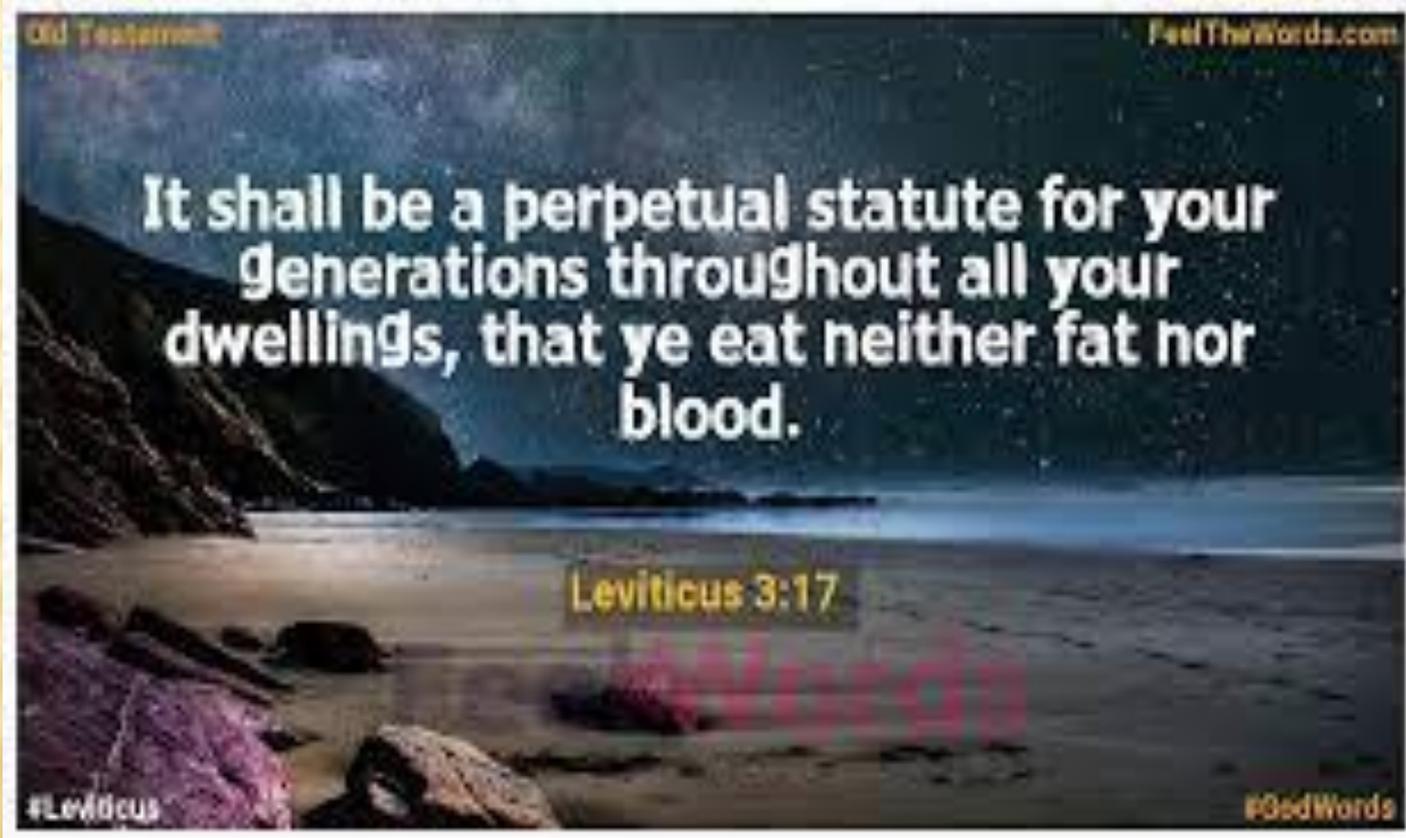

Leviticus 7:23-27

King James Version Bible

Speak unto the children of Israel, saying, Ye shall eat no manner of fat, of ox, or of sheep, or of goat. And the fat of the beast that dieth of itself, and the fat of that which is torn with beasts, ...

- Lev_7:24 and the fat ... may be used in any other use: but ye shall in **no wise eat.**

LEV. 3:17 ...YE EAT NEITHER FAT NOR BLOOD.
